

The procedure with the C interface:

```
for(int i = 0; i < n; i++){  
    if ( 'this index belongs to me' ){  
        nz = 'number of neighbours of i';  
        ia = 'vector of size nz with all values i';  
        ja = 'list of the nz neighbours of i';  
        info = psb_c_cdins(nz, ia, ja, desc_a);  
    }  
}
```
